EDUCATION

Islamia University of Bahawalpur
BS Data Science, CGPA: 3.12

2020-2024

PROFILE SUMMARY

I'm a motivated data science graduate eager to apply my skills in data science, machine learning, and data visualization. I'm excited to help businesses make better decisions using data. I'm a fast learner, adaptable, and always looking for ways to grow in fast-paced environments.

PROJECTS

Diabetes Health Advisor

Developed an AI chatbot using the LLaMA2 model, fine-tuned with custom data to offer personalized diabetes management recommendations.

Student Performance indicator system

Developed a Student Performance Indicator application to track and analyze academic performance, utilizing AWS and Azure for scalable data storage and real-time analytics. Implemented CI/CD pipelines with Docker on Ubuntu for automated deployment and efficient development workflows.

News Article Recommendation System

Built a recommendation system to tailor news article suggestions based on machine learning and natural language processing.

Sentiment Analysis of Twitter Tweets

Performed sentiment analysis on Twitter data to gauge public opinion using NLP and machine learning techniques.

Supervised and Unsupervised Machine Learning Prediction

Applied both supervised and unsupervised machine learning methods for predicting outcomes and analyzing data.

SKILLS

- | | |
|--|-------------------------|
| • Programming Languages: | Python |
| • Data Analysis & Visualization | Excel, Jupyter Notebook |
| • Machine Learning, NLP, Exploratory Data Analysis (EDA) | AWS, Microsoft Azure |
-

ACADEMIC ACHIEVEMENT

- Data Scientist track from DataCamp
- Python for Everybody course from the University of Michigan

SUMMER INTERNSHIPS

- Octalooop Technologies
- Spark Foundation
